

There are three online research studies related to COVID19 being run by faculty at the Ferkauf Graduate School of Psychology in NYC. Please consider participating and also announcing these within your professional and social networks. Many thanks and hope you are all staying safe.

For All Adults:

Please consider participating in this online research study about the psychological impact of the COVID19 pandemic.

For Parents of Children 6-12:

Researchers are looking for parents of children ages 6-12 to participate in an online research study on the impact of COVID-19. Help them learn more about what you are experiencing by completing this survey.

For Therapists:

In light of the current COVID-19 pandemic, we are interested to hear about your transition to providing online therapy. We have developed a brief survey for therapists (all responses are anonymous; the study has been approved by the university's ethics board). Would you share your experience and complete this brief (15 min) survey in the next few days?
